

Instructions for Filling Out the Paper Survey

Check it out! Here is your chance to find out who at your school has similar likes and dislikes and sees the world the same way you do.

Everyone's answer sheets will be scored by Data Match, and you can receive a confidential report showing a list of 15 guys and girls at our school who answered just like you.

1 Write neatly and in dark pen or pencil.

2 Do not use markers or gel pens, unless they are very dark.

3 Fill in ALL the information requested.

4 Make sure you mark your gender. You have to do this twice.

5 For "Match me with students in these grades:" – you may write in the grades you want to be matched with. If you leave them all blank, you will be matched with students in all grades at our school.

6 There are 30 questions, each having five possible answers. Read each question and mark your answer (1, 2, 3, 4, or 5) in the matching answer box at the bottom of the form. If you do not mark your answers in the boxes, your survey will not be scored and you will not receive any printouts.

7 Fill in one survey only. Duplicates are deleted.

We expect this to be the talk of the school when the results come in. So, don't be the only one who doesn't buy their results.

Advisor, these instructions apply to the Traditional and Eco-Friendly programs only. The Eco-Max program is all online. They can either be read to the students or copied on the back of the questionnaire to be filled out by the students.
